**RE: Westmeath Sand Dome Project**

I wanted to personally thank everyone involved with the Westmeath Sand Dome project. This project had extremely tight timelines that have been met with professionalism second to none! Interaction and communication from all members of your team kept us in the "loop" at all times giving us a sense of satisfaction that the project was on track and on budget during the whole process. The structure you have supplied has far exceeded our expectations and I am confident in saying it will provide many years of maintenance free service for our Municipality in a very cost effective manner.

Thank you all Again!

## Westmeath Sand Dome Gets \$200,000 Facelift **November 17 2016**

*Worn out tarp roof replaced with galvanized steel roof*

The sand dome in Westmeath received a \$200,000 facelift as the 30-year-old worn-out tarp was replaced with a galvanized steel dome. The contract was awarded to Triodetic of Arnprior but Dennis Wren of Cobden did the work, which took about a month. The cost was around \$200,000, noted public works manager Bill Misener. The tarp

was about 30 years old, he said, noting Joey Trimm was the road supervisor for Westmeath Township at the time. The dome is now filled with sand for this winter.
